

Dr. Yang's Family Care  
... in the spirit of healing...

June 30, 2020

Dear Patient,

After you select your new doctor and sign their medical record release, we will send them one copy of your medical record, including the last 3 progress notes, labs from this year or the most recent if they are older, and radiologic results from this year. We plan to send these electronically.

Usually these are given to one new doctor. If you prefer to have them yourself, we will ask you to pay for any additional copies sent to anyone. Charges depend on the number of pages in your record and postage.

With a signed release, you can pick up the originals of anything prior to 2010.

Please include a signed copy of this letter with your medical release form if you wish to receive your records personally.

Many blessings for health,

Therese H. Yang, MD

I understand that I will be charged for additional medical record releases beyond this last copy.
